

## 3.30-4.2 CV- Recess Media 1 Class Flow

### PROJECT: “Good to See You”

**Background:** When the CV virus is in our rear view window, the world will return to our natural inclination to greet each other with both non verbal and intimate expressions of comfort in seeing a colleague, classmate, family member or friend. But there certainly will be a “tapering” effect to greeting these groups will full bodied expressions of hugs, kisses and the elaborate handshakes we’ve been accustomed to.

**GOAL:** Produce **3 video shorts** that suggest ways humans might communicate the following greetings - upon meeting another human being. Assume that the world is not quarantined anymore, and you meet people in the normal places you see them. (School, street, neighborhood, parties etc) **Will it be a non-verbal gesture, a dance, a bow, a sign or what?**

#### **MAKE ONE VIDEO FOR THREE OF THE FOLLOWING**

##### **SCENARIOS:**

1. A greeting to a new acquaintance you are introduced to
2. A greeting to your best friend(s)
3. A greeting to someone you have romantic feelings for and plan to pursue
4. A greeting to your boss
5. A greeting to an extended family member
6. A greeting to someone you haven’t seen in a long time
7. A greeting to someone you are not happy to see
8. A greeting to someone you don’t want to talk to
9. A greeting to a famous person you are excited to be introduced to
10. A greeting to someone who has performed heroic feats in the defeat of the Corona Virus - *Extra Credit!*

##### **TOOLS:**

- If you have a digital video camera or DSLR at home, feel free to use them. Most of you will use your cell phones to record this.
- Although there are plenty of places to post your video, we want to edit together a huge compilation of your ideas - so all the link to the video you produce needs to be linked in the box below.

**See more below**

	<b>CAMERA</b>	<b>EDITOR</b>
<b>APPLE</b>	On board camera	Apple Imovie Splice VideoShop
<b>ANDROID</b>	On board camera	PowerDirector VivaVideo Magisto
<b>CHROMEBOOK</b>	On board camera	VivaVideo Magisto WeVideo

**CONSIDER:**

- Shoot horizontal !
- Avoid any unnecessary sound in your piece. (laughing, talking, music, etc)
- Avoid harsh backlight and over exposure
- Utilize smart camera-shots
- Shoot for about a ten second maximum length. Videos can be shorter.
- Any inappropriate, language, comments, or gestures will be addressed. Be smart.
- Our general Video Post Rubric will be used for overall grading of quality
- Save your videos as mp4, or H.264, or mov file formats

**NAME YOUR VIDEO LIKE THIS: *G2CUYOURLASTNAME.MP4***
